What do you know?

Complete a concept map on what you currently know about general migration to Australia and about Italian migration include also the contribution of Italians in Australian society.

You could use the software *Inspiration*, or you could use autoshapes within Word to complete this task.

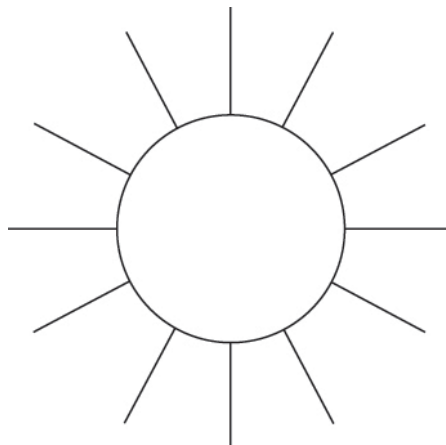

Color code the information using the traffic light approach. Green if you are sure it is accurate and orange if you are unsure.

Once you have completed this individually, share your knowledge with a partner.

Sunshine wheel

The sunshine wheel is used to brainstorm ideas in groups. The central topic is written into the middle and then the arms on the outside are used to record student responses. They could be emotions associated with a word, components that make up an object or thing, adjectives to describe an object.

Depending on the developmental level of students, teachers can easily adapt this tool to make it more challenging and extend thinking in a particular direction. Teaching this tool is also a possible beginning step in introducing students to the process of mind mapping.
