MEMOIRS of MUSEUM VICTORIA

ISSN 0814-1827

Frequency: 2 issues per year

Museum Victoria, formerly the Museum of Victoria, was formed in 1983 by the merger of the National Museum of Victoria (established in 1854) and the Science Museum of Victoria (established in 1870). Among the Museum's objectives are scholarship and education in the fields of natural history, science and technology, and history of human society. Museum Victoria publishes its scientific journal *Memoirs of Museum Victoria* (until 1983 *Memoirs of the National Museum of Victoria*) to further these objectives.

The *Memoirs* publishes papers on original research in the natural sciences pertinent to Victoria and/or the Museum's collections. All contributions are assessed by independent referees before publication.

From Volume 58 (2000) the *Memoirs* are available in electronic format as well as in printed form from the Museum Victoria website (www.museum.vic.gov.au/memoirs/index.html). Electronic publication will enable inclusion of supplementary information (such as extended data-sets) not available in the printed version.

The *Memoirs* is available in printed form by subscription or institutional exchange. Enquiries should be directed to the Librarian, Museum Victoria, GPO Box 666E, Melbourne, Vic. 3001, Australia (library@museum.vic.gov.au). Access to the electronic version of the journal is available free of charge and individual papers may be downloaded as .pdf files from this website.

Editorial Committee

The *Memoirs of Museum Victoria* is published by order of the Museums Board of Victoria. Acceptance of paper is handled by the Editorial Committee which will seek the widest possible advice from referees. Papers should be submitted in the first instance to the Scientific Editor, Museum Victoria, GPO Box 666E, Melbourne, Vic. 3001, Australia (memoirs@museum.vic.gov.au).

Instructions to Authors

Three copies of the manuscript with accompanying plates and figures should be submitted to the Scientific Editor, Museum Victoria, GPO Box 666E, Melbourne, Victoria 3001, Australia (memoirs@museum.vic.gov.au). Authors should consult a recent volume of the *Memoirs* to acquaint themselves with format. Manuscripts must be typed on A4 paper, 1.5-spaced, on one side of the paper, or submitted totally in electronic form as attached files by email. Except for short papers (less than 10 manuscript pages) electronic presentation of the text of the final accepted manuscript (on disk or as an attached emailed file) is essential.

Papers should be arranged as follows: title (including higher classification of zoological taxa); authors' names and addresses (postal and email); abstract; contents (only if the paper is very long); introduction and main text; acknowledgements; references; index (only if very long); and tables. Captions to text-figures and plates must be attached to the manuscript as final pages. Primary headings are in bold and centred; secondary headings in italics and left justified. Italics in the text should otherwise be restricted to generic and specific names. Paragraphs are indented with tabs. Measurements must be in the metric system (SI units).

References should be listed alphabetically at the end of the manuscript. Journal titles must be in full. References to books must give the year of publication, edition, name of publisher and city of publication. Use the style and punctuation in the following examples for articles, books and chapters:

- Paulin, C.D., 1986. A new genus and species of morid fish from shallow coastal waters of southern Australia. *Memoirs of the Museum of Victoria* 47: 201–206.
- Last, P.R. and Stevens, J.D., 1994. *Sharks and rays of Australia*. CSIRO: Melbourne. 513 pp.
- Wilson, B.R. and Allen, G.R., 1987. Major components and distribution of marine fauna. Pp. 43–68 in: Dyne, G.R. and Watson, D.W. (eds). *Fauna of Australia. General articles*. Vol. 1A. Australian Government Publishing Service: Canberra.

Reference citations use the following style: Paulin, 1986; Last and Stevens, 1994; Smith et al., 1990.

In taxonomic papers synonymies should be of the form: taxon, author, year, pages, figures. A period and dash must separate taxon and author

except in the case of reference to the original description, e.g.,

Leontocaris Stebbing, 1905: 98–99.—Barnard, 1950: 699.

Photographs must have clear definition and be submitted as either glossy or flat prints at the actual size for reproduction, or as electronic files. Line drawings for text-figures should be in black ink on white card or drawing film, or as images at a minimum of 600 dpi. Maximum full-page size is 140 mm wide by 193 mm; single column width is 67 mm. Clear lettering must be inserted.

Original line drawings up to twice final size are acceptable.

Supplementary information (extended lists of material examined, databases etc.) should be submitted electronically with the original manuscript and will be included with material sent to referees. The Editorial Board encourages use of supplementary information to minimise the cost of printing as long as the requirements of the International Code of Zoological Nomenclature are met in the printed paper.

CONTENTS

New genus and species of southern Australian and Pacific Asterinidae (Echinodermata, Asteroidea) <i>P. M. O'Loughlin</i>	277
Report on selected species of BANZARE and ANARE Holothuroidea, with reviews of <i>Meseres</i> Ludwig and <i>Heterocucumis</i> Panning (Echinodermata) <i>P.M. O'Loughlin</i>	297
A new species of <i>Neanthes</i> (Polychaeta: Nereididae) from southern Australia <i>T. Bakken</i>	327
<i>Corystolona</i> , a new hydroid genus (Leptolida: Leptothecatae) from southern Australia <i>J.E. Watson</i>	333
Hydroids (Cnidaria: Hydrozoa) from southern Queensland <i>J.E. Watson</i>	337
A revision of the Australian genus <i>Umbilia</i> (Gastropoda: Cypraeidae) <i>T.A. Darragh</i>	355
The Australian species of <i>Chimarra</i> Stephens (Trichoptera: Philopotamidae) <i>D.I. Cartwright</i>	393
Five artotrogids (Crustacea: Copepoda: Siphonostomatoida) from Eastern Antarctica <i>R. Johnsson and C.E.F. Rocha</i>	439
New Phreatoicidea (Crustacea: Isopoda) from Grampians National Park, with revisions of <i>Synamphisopus</i> and <i>Phreatoicopsis</i> <i>G.D.F. Wilson and S.J. Keable</i>	457
Redescriptions of <i>Asphalidesmus leae</i> Silvestri, 1910 and <i>A. parvus</i> (Chamberlin, 1920) comb. nov. from Tasmania, Australia (Diplopoda: Polydesmida: Haplodesmidae) <i>R. Mesibov</i>	531
<i>Pycnogonum</i> (Pycnogonida: Pycnogonidae) from Australia with descriptions of two new species <i>D.A. Staples</i>	541
